
BCS
Ridge regression
$\alpha = 1000$
only trained part
(64 cows, 542 photos)
Per-region average
5×1024 + 5 absence flags
5125 per photo
loin mask not used
6 region masks
FPN decoder
sigmoid, 6 channels
masks averaged with
the mirrored image
(TTA, thighs swapped)
Patch tokens 20×20×1024
CLS and
registers dropped
Final Layer Norm
blocks 22–24
not used
features of blocks 3, 6, 9, 12
LayerScale
MLP
Layer Norm
